

# BRENDAN JAMES

**Brendan James** is an American Singer-Songwriter in the pop/folk genre, akin to David Gray, Jason Mraz, and Elton John. Signed to Capitol Records at age 25, Universal Records at 28, **James** has reached the #1 spot on iTunes multiple times, accrued more than one million fans in 65 countries on Spotify, and has been played on multiple formats of American and European radio. He has collaborated or toured with the likes of John Mayer, John Legend, Cat Stevens, Carly Simon, Keb Mo, and Andy Grammar, and his songs have been placed in over 15 major television shows and films worldwide.

Truly summing **Brendan James** up is a difficult task though. You'd have to meet him, talk with him, hear him sing his songs to understand his shocking talent and unique purpose in today's over saturated music scene. As he puts it: "What I hope to do is calm, strengthen, and transport my listeners to a better self, and in turn maybe I get there too." And he means it. Penning songs on the topics of love, optimism, political enlightenment, simplifying, self-empowerment, marriage equality, wanderlust, raising a family, aging, and adventuring aimlessly through the natural world, **James** has left no stone unturned in his six studio albums to date; and in his words, "I've only just begun."

Just home from a 6-month journey around the globe with his wife and two toddlers, **James** has a plethora of new material and is set to release 4 singles this year, with a full-length album coming in the Spring of 2020. His first single, "Through Our Hands" is an autobiographical telling of his family's trip to 10 countries, watching his children grow ever too quickly along the way.

Find **Brendan** on Apple Music, Spotify, Amazon, and wherever else music is streamed or sold. Book him for a private show if you get the chance - a trend in performing that he has helped pioneer and sees as the future of a better artist-audience connection. Or catch him in one of the many public venues he plays regularly in the US and abroad. Either way, bring a friend and take the ride. It's the only one like it in today's music biz.
